SALEH ALASSAF

Software Engineer | AI & Full-Stack Developer

+966550866036 | AlassafSaleh@hotmail.com | Portfolio | Saleh Alassaf | 2saleh1

PROFESSIONAL SUMMARY

Computer Science graduate from Qassim University specializing in full-stack and AI-driven development. Experienced in building end-to-end web and mobile applications with hands-on expertise in machine learning, NLP, and computer vision. Developed practical AI and software solutions, including an Arabic voice assistant, computer vision systems, and a mobile platform for stadium ticketing and fan loyalty. Skilled in developing scalable solutions across frontend, backend, databases, and AI systems.

EDUCATION

Bachelor of Computer Science, *Qassim University* Qassim | 09/2021 - 06/2026
GPA: 4.28 / 5

EXPERIENCE

Full Stack Robotics Engineer (Intern), *Smart Methods* Jeddah | 06/2025 – 08/2025

- Engineered an interactive Arabic voice assistant using Python, integrating Cohere's LLM API for NLP, RealtimeSTT for speech recognition, and gTTS for real-time audio synthesis.
- Developed practical computer vision applications, including a real-time face recognition attendance system and a sleep detection machine learning model.
- Managed project environments and source code, utilizing Anaconda for environment configuration and GitHub for strict version control and technical documentation.
- Built a responsive full-stack web application using PHP, SQL, and HTML/CSS/JS, featuring secure hardware toggle inputs for remote system interactions.
- Assembled and programmed a 5DOF 3D-printed robotic arm, integrating 6 servo motors with an Arduino microcontroller to perform precise, coordinated movements.

Freelance System Developer & Designer, *Sama Oil* Qassim | 08/2025 - 11/2025

- Developed a comprehensive Periodic Inspection System to digitize and automate operational workflows, tracking station hygiene, cleaning routines, and overall facility compliance.
- Engineered custom web modules (HTML/CSS) for logistics management, featuring a secure digital signature interface for drivers during fuel station discharge operations.
- Streamlined facility administration by building digital reporting tools for maintenance requests, post-maintenance evaluations, and employee training records.

CERTIFICATIONS

- **Oracle Certified Foundations Associate,** *Oracle 07/2025*
- **Artificial Intelligence Concepts and Advanced Applications,** *SDAIA 02/2025*
- **Fundamentals of Artificial Intelligence,** *SDAIA 02/2025*
- **Full Stack Robotics Engineer,** *Smart Methods 08/2025*
- **Building with the Claude API,** *Claude Academy 08/2026*

PROJECTS

Fan Engagement & Loyalty App, *Graduation Project*
Built a cross-platform fan engagement platform using React Native, Expo, and Supabase with real-time season ticket booking and a custom interactive stadium seat map. Engineered a Dynamic Points Algorithm using PL/pgSQL to automate loyalty rewards based on attendance, punctuality, match outcomes, and opponent ranking. Implemented secure QR-based gate validation, real-time seat locking, and Row-Level Security (RLS) to ensure secure, scalable operations.

PROFESSIONAL SKILLS

Programming Languages: Java, Python, C++, HTML, CSS, JavaScript, PHP, TypeScript
Artificial Intelligence: Machine Learning, Deep Learning, NLP, Computer Vision, TensorFlow, Neural Networks, LLMs
Data Analysis: Pandas, NumPy, Matplotlib
Microsoft Office: Word, PowerPoint, Excel
Backend & Development: SQL, Supabase, Node.js, Git, GitHub, Django, React Native, Next.js, PostgreSQL, CI/CD
Soft Skills: Problem Solving, Critical Thinking, Communication, Teamwork, Creativity

LANGUAGES

- **Arabic (Native)**
- **English (Professional Working Proficiency)**
